

JUST GLEANINGS

C.C.F. WILL CONTEST
BY-ELECTION AT CAMROSE

The Alberta Council of the C.C.F. on Saturday endorsed the decision of the Camrose C.C.F. Council to nominate a candidate for a by-election on November 29 to select a candidate for the provincial by-election necessitated by the death of Hon. D. M. Mullen, minister of agriculture.

Someone says it was announced that should the C.C.F. nominate a candidate, the Independents would also nominate a candidate, and if this occurs a three-way fight will follow.

ALBERTA HAS MUCH OIL SANDS

Oil sands of the Athabasca Lake, Alberta, area contain four times the estimated oil reserve of present accredited oil fields in the world, Max W. Ball, Edmonton oil engineer, told the final session of the western meeting of the Canadian Institute of Mining and Metallurgy.

Mr. Ball said experts believe the Alberta district contains 100,000,000 barrels of oil, while the estimated reserve of present fields in the world is set at 25,000,000 barrels.

An estimated 30,000 square miles of oil-bearing sand exist in this northern Alberta region, he said, and oil extraction runs as high as 27 per cent. He said that new refineries built by the oil companies which make the oil, are thought worthless, completely useless.

CONDITIONS IN THE SOUTHERN HEMISPHERE

Harvesters are striving in some districts in Australia, being earlier than usual because of the dry, hot weather. The Australian government has issued a preliminary estimate of 50 million bushels for the wheat crop, and early threshing seems to bear out the forecast. Yields are very low, but the wheat is of high quality.

Argentina, on the other hand, is likely to have a good crop and a substantial surplus will be available for export, probably around 140 million bushels. Harvesting will be general in December.—West Post Bulletin.

PREMIUMS PAID, MALT BARLEY

Farmers having barley of malling quality are in a position to realize substantial premiums on such grain. A Calgary sample storage is available for handling suitable malling barley. The Canada Maltting Company is paying a premium of 8 cents this year for suitable 2 C.W. and C.W. six row barley, and 3 cents per bushel for suitable 3 C.W. and lower grades.

LOWER PRICE PAID FOR BACON

OTTAWA—The new bacon agreement between Canada and the United Kingdom provides the British food ministry pay a flat rate of \$15.82 per 100 pounds for all grade "A" Wilshire sides and \$14.82 for grade "B" Wilshire sides delivered at a Canadian seaboard. The old price was a little over \$18 per 100 pounds.

The new bacon agreement negotiated by agriculture minister Jas. G. Gardiner during a recent visit to Britain provides for heavier purchases of Canadian Bacon at the rate of the British food ministry, at prices lower than the first agreement entered into a year ago.

OTTO SCHIELKE ELECTED NEW PRESIDENT OF THE CARBON CURLING CLUB

Fees For Season Set at \$6.00 For Town Members

The annual meeting of the Carbon Curling Club was held in the municipal office on Wednesday evening, November 19th, with a fair turn out of interested players. The minutes of the previous meeting were read and adopted and the secretary's report was given, which showed a balance of \$24.22 on hand.

Election of officers was as follows:

Hon. President, Rev. Wm. McNichol.

President, Otto Schielke.

Vice-President, Cyril Poon.

Sec.-Treas., Wm. Harvey.

Chaplain, Rev. H.R. Hinchoy.

Executive, B. C. Downey, S. N. Wright, H. Woods, A.P. McKibbin and J. A. Flaws.

Ice Committee: Dick Gimbel, S. J. Garrett and F.E. Priebe.

Bongoli Committee: Len Poon, B. C. Downey, S. N. Wright, H. Woods, A.P. McKibbin and J. A. Flaws.

Draw Committee: Otto Schielke and Cyril Poon.

Amount of fees for the season took place and these were set at \$6.00.

Appointment of a caretaker was left in the hands of the Executive to call for 1941.

Selection of rinks will be the same as last year, the skip to choose their own members and collect fees for the entire rink.

Discussion took place on the holding of an open bongoli at the start of curling and this was decided on. A fee of \$1 will be charged each player and should be continued to curl this year will be deducted from his regular fee.

MANY ATTEND SWALLOW CHICKEN SUPPER ON NOV. 13.

According to word from Swallow 120 persons attended the Chicken supper last night under the auspices of the Swallow Ladies Aid of the United Church on Wednesday, November 13.

Following the supper a short program was carried out and when official tally was made it was shown that \$96.95 was received at the door.

B.A. TO REFINA AVIATION GASOLINE IN CALGARY

Aviation gasoline for distribution throughout Alberta will now be manufactured in the new East Calgary refinery of the British American Oil Company Ltd., according to an announcement by the provincial manager J.C. Hall. Necessary equipment has been installed in the new plant. The refinery will be the largest of the requirements of training plants operating from the many Alberta bases of the Empire air scheme.

NEW COLOR COMBINATION FOR ALBERTA CAR PLATES

Alberta's motor license plates for the next license year, which opens on April 1, 1941, will be white numerals on a black background according to an official announcement by E. Trowbridge, deputy commissioner of motor vehicles. It will be the first time in a long period of years that this combination has been selected for Alberta.

THE WORLD OF WHEAT REVIEWED WEEKLY BY MAJOR H.G.L. STRANGE

It seems fitting indeed that Great Britain and the Greeks should be standing side by side defending democracy against a common enemy.

Democracy, or those principles of freedom and liberty which insist that the individual citizen is superior to the State, and that not merely the power of a monarch or a dictator was first invoked by Solon the Greek in the year 594 B.C. and was actually put into practice as a system of government in Athens—with a deliberative assembly which sat continuously through the year to decide on laws and to govern the country, in 593 B.C.

This system of democracy was eventually lost by the Greeks, but the English will be back for the common people when King Magna Carta at Runnymede on June 15th, 1215.

Today these dearly won rights and liberties are again in danger, and it is the position to grant them to the Greeks, who restored it to the world, should be restored to the individual; and fighting moreover on the very same ground as the Greeks.

Democracy was originally by the Greeks in 594 B.C., or 2443 years ago.

POULTRYMEN'S VOTE TO BE TAKEN IN ALTA. SOON

Great Britain wants to buy Alberta eggs, but before that market can be supplied, Alberta producers must be in a position to guarantee the quality of stipulated volumes of eggs will be available at stated times.

In other words, Alberta's surplus egg supplies must be coordinated in order to facilitate shipment to Great Britain. Furthermore, methods of grading must be improved.

Last spring, representative poultrymen met in Edmonton and asked the Department of Trade and Industry to help them prepare an egg marketing plan. They set up a working committee which drew up a plan and are now ready to submit it to egg producers of the province for their approval.

Last spring, representative poultrymen met in Edmonton and asked the Department of Trade and Industry to help them prepare an egg marketing plan. They set up a working committee which drew up a plan and are now ready to submit it to egg producers of the province for their approval.

At the meeting of November 25 at meetings which have been organized in most of the counties, the plan which is to be addressed by poultrymen who are interested in the plan, at the requirements of training plants operating from the many Alberta bases of the Empire air scheme.

U. OF A. UNION FEES REFUND

University students who join the active service forces will have their Students' Union fees refunded, it was ruled by the union council this week.

Other activities of the union will include the raising of funds for the annual Christmas fund, which is used to distribute hampers to needy families in the District during the service of the department of health.

Another recent was broken this year in the number of pleasure car licenses issued in Alberta, with 2500 more licenses issued than at this time last year, and 2,730 more than the whole of last year. The total so far is 91,000.

LONG YEARS AGO

November 21, 1929

The Carbon Chess Club organized for the season Wednesday, C. McPherson was elected president, R. Heath vice-president, and W. A. Braisher secretary-treasurer.

The skating and curling rinks are being flooded and cold weather has set in.

The old barn at the rear of the United Church burned to the ground Friday night.

Perry Edwards has a new Nash sedan, 1930 model.

The Carbon oilmen held their annual re-union in the Farmers' Exchange hall last Wednesday night. The crowd was the smallest on record.

Heads C.P.R. Police

Large Crowd Monday

The Farmers' Exchange hall, Carbon was packed to capacity Monday night when the John Deere show was put on through the courtesy of the local agent, C.A. Creamer. The show was free and five different pictures were run off as follows: "Melody Comes to Town", "The Road to Happiness", "The Shepherds Take a Vacation", "The Control of Quality", and "What's New in Farm Equipment".

Pictures were given out to holders of lucky tickets and were won by Miss Dorothy Hay and Robert Little.

OLD TIMERS WILL HAVE BANQUET AND DANCE IN CARBON ON NOV. 25TH

Posters are out announcing the annual banquet and dance of the Carbon Old Timers' Association, to be held in the Farmers' Exchange hall on Monday, November 25th.

The banquet starts at 7:00 p.m. and will be followed by a "super-splendid" and "super-luxurious" program. This will be followed by an old time dance with music being furnished by Tony Toot's orchestra of Carbon.

The following are the qualifications necessary for those to attend the banquet and dance: "Those who came to Alberta before December 31st, 1911, and have resided in the Carbon district for five years, their wives or husbands, and sons or daughters 21 years of age or over".

And as Charlie Nash says: "Come to the Banquet, Leave Your Hated Old Farm; A blow-out and dance won't do you any harm."

EARLY CLOSING BY-LAW TO BE STRICTLY ENFORCED

The Council of the Village of Carbon has announced that the Early Closing By-law is to be strictly enforced and offenders will be punished on conviction. Cards have been distributed to business places announcing time of closing and patrons are asked to make a note of the times and shop accordingly.

All retail stores must close at 6 p.m. on week days, 1:00 p.m. on Saturdays, and 10:30 p.m. on Sundays. No sale can be made after these hours.

Restaurants will remain open as usual, but after the above hours they may only sell confectionery and tobacco, besides their meals and lunches.

CARBON AND DISTRICT NEWS NOTES

Miss Dorothy Mortimer left Saturday for Calgary where her sister, Mrs. Parker, is seriously ill.

A few farmers tried to combine this week, but the wheat t-tied over 20 per cent.

Mr. and Mrs. C.A. Creamer were Calgary visitors Sunday.

Mild weather the past week has been appreciated. The snow, however, appears to be here to stay.

W. A. Braisher was a Calgary visitor Monday of this week.

Mick Skerry has been appointed as caretaker of the Carbon Curling rink, and ice making will proceed as the weather permits.

Mr. and Mrs. Len Poon motored to Calgary Friday, Miss Zena Fairbairn returned to Carbon with them and is visiting for a few days in town.

Born, to Mr. and Mrs. Dave Anderson on Saturday, November 16, a daughter.

Mrs. S. F. Torrance is spending a few days in Calgary, going in on Sunday.

The Carbon United Sunday School will hold their annual "Bally" on Sun. day, November 24th.

Art Buyer returned Sunday from Eastern Canada, where he went to take delivery of a new Dodge sedan, sold through the local agent, C.A. Creamer.

Mr. and Mrs. Perry Edwards motored to Calgary Sunday.

FOR SALE—Two Yorkshire Breeds—Alex Reid, Carbon. 2tc

Mr. and Mrs. G.L. McFarlane were Calgary visitors Sunday.

A number of Carbon and district boys leave today for their month's training at Red Deer camp.

Don't forget the Carbon Old Timers banquet and dance on Monday night.

Mr. and Mrs. Dick Gimbel were Calgary visitors last week.

Send or bring in any new items that you may know of. The Chronicle is always glad to get local news items and in many cases these are only available from the people involved.

JOHN DEERE SHOWS DRAW LARGE CROWD MONDAY

The Farmers' Exchange hall, Carbon was packed to capacity Monday night when the John Deere show was put on through the courtesy of the local agent, C.A. Creamer. The show was free and five different pictures were run off as follows: "Melody Comes to Town", "The Road to Happiness", "The Shepherds Take a Vacation", "The Control of Quality", and "What's New in Farm Equipment".

Pictures were given out to holders of lucky tickets and were won by Miss Dorothy Hay and Robert Little.

BOARD OF TRADE URGES WHEAT BOARD TO RAISE QUOTA BY FOUR BUSHELS

Local Elevators Can Take In Some Tough Wheat

At a well attended meeting of the Carbon Board of Trade on Monday the question of raising the wheat delivery quota at Carbon and Sharples was thoroughly discussed.

It was pointed out that there was available at Carbon for approximately 70,000 bushels of grain, and at Sharples there was storage space for an additional 40,000 bushels.

A motion was finally passed to the effect that the Carbon Board of Trade send a wire to the Wheat Board urging the immediate raising of the delivery quotas at Carbon and Sharples by four bushels to the seed acre. A committee was appointed to draft the wire, which reads as follows:

"The following resolution was passed at a representative meeting of the Carbon Board of Trade this evening: 'That we respectfully petition the Wheat Board to raise the delivery quota of wheat at Carbon and Sharples an additional four bushels per acre.'

Will Take Tough Wheat At the meeting a communication from the Canadian Wheat Board to the elevator agents was read, which stated that approximately 75,000 bushels of tough grain could be taken from the district if available. Farmers in the district who have tough wheat to dispose of are asked to get in touch with their elevator agent for further particulars. As the order for this tough wheat may be cancelled at any time, the matter is considered urgent and should the quota be raised no doubt considerable tough wheat will be hauled immediately.

WEDDINGS

LUFT-MOEBES

A pretty wedding was solemnized at the home of Mr. and Mrs. Henry Luft on Saturday, November 16th, at 2:30 p.m. when Evelyn Bertha, daughter of Mr. and Mrs. Charles Moebes of Headley, became the bride of Victor Luft, son of Mr. and Mrs. Henry Luft.

Mr. Fred Elward of Crossfield, became the bride's sister of the groom, attending the bridal couple.

Rev. R.E. Hinchoy of Carbon was officiating clergyman.

A wedding dinner was served to the guests who were composed of immediate families and relatives.

Following a short honeymoon Mr. and Mrs. Luft will reside on their farm at Carbon.

OBITUARY

KENNETH REMPFER DIES

Word was received in Carbon last Thursday that Kenneth Gail Rempfer, 18-month-old son of Mr. and Mrs. Theodore Rempfer of the Granger district had died at his home following a three weeks illness.

Funeral services for deceased were conducted from the home of Mr. and Mrs. John Glick on Saturday afternoon at 2 o'clock and interment followed in the Baptist cemetery.

Looking At The Future

The recent announcement that the development of navigation, as well as that of power, in connection with the agreement between the United States and Canada providing for the completion of the St. Lawrence seaway project to the Great Lakes, is to be given attention is one which will lend additional interest to the project in Western Canada.

The navigational aspect of the project, which has been overlooked in publicity surrounding the related agreement and its potential effects on the industrial life of this country is, in fact, of greater interest and importance to the west than the further development of hydro-electric power in the international rapids section of the St. Lawrence river.

For this reason, it is to be hoped that there is authenticity in the statement that President Roosevelt has no intention of sidetracking navigation by pushing power development on the project alone, and that no time will be lost in completing the necessary preliminary surveys and getting actual construction work underway.

There is considerable interest in the declaration attributed to Washington officials that "Had the seaway, with its 2,500 miles of navigable water, been constructed, every great lakes port in the United States and Canada would have participated in both American and British shipbuilding programs."

The interest in this statement does not centre in what might have been, but rather in the benefits that may and should accrue to Western Canada if the project is brought to fruition, and more particularly if it can be completed in time to ensure its early use in the war is over.

At The Back Door

The completion of the seaway project, in effect, will bring the ocean to the back door of this province. It will mean that the largest ocean going commercial vessels will be able to tie-up at docks at the head of the great lakes, load their export cargoes there and carry them to ports of discharge in Europe or elsewhere without incurring costs of trans-shipment or any other handling charges en route. It will save in freight and insurance rates and handling charges thus effected are passed back to the producer, as they should be, the Western Canadian farmer should derive some benefit from this great undertaking.

The completion of the St. Lawrence seaway project to the head of the lakes should assure the future of an ocean port for Fort William and Port Arthur. With the growth of population and of industrialization in the prairie provinces, the development of a Canadian Chicago at Fort William or thereabouts seems to be not an unwarranted prospect for the future. The existence of a great metropolis and port at the head of the lakes on the Canadian side would mean the prosperity of the prairies. It should provide an expanding market for some of the commodities which the prairies now have to offer and for an increasing variety of commodities which they may have available in the future.

The statement that great lakes ports would have participated in ship building programs to meet war requirements had the St. Lawrence seaway project been constructed by this time is an inkling of one of the possibilities which peace time may hold for a Canadian port at the head of the lakes after the completion of this gigantic project.

The development of a large industrial centre at the head of the lakes might conceivably furnish a market for natural gas, which there is reason to believe, will some day be available in Saskatchewan in sufficient volume to warrant piping to the head of the lakes. If such a development becomes an economic feasibility it might be expected to solve the problem of power for many small industries due to the larger market.

A Word Of Warning

The completion of the St. Lawrence seaway project to the head of the great lakes, however, is to furnish a protest to permit the Hudson Bay railroad and the terminal facilities of the Hudson Bay route at Churchill to fall into disuse and decay; still less should the prospect of the completion of the project to the head of the lakes be permitted to cause it to be the interest of the people of Western Canada, and certainly those of Saskatchewan and Manitoba to see to it that competitive routes are available for the transport of export and import commodities between the prairies and the world market, when the latter again become available.

There is every reason to believe that the mere existence of the Hudson Bay route, even when it was not extensively used, acted as a curb on freight charges on the great lakes, when the latter again become available. In fact, the Hudson Bay route has already been of some value to the agricultural industry of the west.

It should not be forgotten that some fifty million dollars has been spent on the northern route and that it was mostly financed by the west. After the war the route via the I.R. should be developed to the extent of demonstrating that it has a direct value to the western prairies, but that will not be so easy, if in the meantime, the railway and the facilities at Churchill are permitted to disintegrate. If that is allowed, it may never be rehabilitated.

Expensive Luxuries Now

Price Of Onions And Peas Has Soared In Great Britain

One of the strange results of the war has been the heavy increase in prices of both onions and peas in Great Britain. Meats and other vegetables have not soared in cost, but the onions and peas have climbed beyond normal. While epicureans take gastronomical delight in the onions and peas, most of the people have decided they can get along without the two vegetables for the duration. They think if that is the only shortage they encounter, it will not be such a tough war on the stomach after all.

Invented The Menu

The German politician and gourmet, Henry of Brunswick, reputedly invented the menu in 1489 when he ordered his cook to list on paper the viands to be served at each course and his appetite for those he liked best.

Awarded George Medal

Messenger In Wales Displayed Unusual Courage During Air Raid

Wyn Jones, a Welshman of Oswestry, Shropshire, Wales, A.R.P. messenger who was twice blown off his motorcycle by bomb blasts, has been awarded a George Medal, "for unusual courage, determination and pluck in an air raid."

Jenkins was stationed at an A.R.P. post during a raid in which some 250 high explosive bombs were dropped. Carrying a message to the central control two miles distant, he rode through a rain of falling shell splinters. En route he ran into a pile of debris tossed into the road by a bomb and was thrown off his machine. He picked himself up and went on.

Two high explosive bombs burst on a street along which he was riding, Jenkins was hurt from his motorcycle and knocked unconscious. After receiving first aid he finished the trip on two flats and delivered his message.

As a self-help project, Haida Indians in Alaska have launched a co-operative salmon cannery.

Britain's biggest asset is the rightness of its cause. 2385

Times Will Be Published

London Newspaper Will Come Out No Matter What Happens

"Whatever happens—no matter what happens, the Times will be published," is the motto of the Times newspaper. It is published in London, if that should be rendered impossible, we will publish somewhere in the country. As long as there is a suitable printing plant in England the Times will be printed and published. And if you can imagine such a thing that we are blown out of Britain, then we'll cross the Atlantic and publish the Times there!"

With this declaration made to him by C. S. Kent, manager of the Times, Capt. F. D. Bone has an interesting article in Editor and Publisher on "How the Times is Meeting Waves of the War."

Regarding newspaper, Mr. Kent is quoted as saying that most newspapers have still considerable stocks of paper. No newspaper in the country should carry on for eight or nine months.

"Arrangements are being made to help everybody. No newspaper in the country should go without its share. In spite of rationing there is no immediate anxiety. We have good stocks and the Newspaper Supply Company will insure imports from Canada and Newfoundland so long as that is humanly possible. We are confident about that."

Kent observed during the interview that the present war has destroyed the fallacy that war is good for newspapers and Capital. Bone comments on this.

"That fallacy began, I suspect, when Delane dragged Russell and the Times through the 'gallery' of the House of Commons and sent him to the Crimea war to tell the world, and afterwards to the Indian Mutiny and to your Civil War, to tell the world again."

"Then, indeed, on great occasions such as the Boer war, the Times was Mr. Kent said that despite news reports by wireless, six times a day the circulation is not affected. People still want newspapers and they will verify and amplify—and, yes, to steady themselves with the view of the newspaper in which they put their trust."

Mr. Kent concluded the interview with the words: "Tell them that we will send the United States a victory copy of The Times."—Newspaper World, London.

SELECTED RECIPES

BAKED STUFFED APPLES

6 large, firm apples

1 cup chopped dates

1/2 cup seedless raisins

1/2 cup currants or White Curr Syrup

1 tablespoon lemon juice

1 tablespoon butter

1/2 cup corn syrup diluted with 1/2 cup water

Wash apples, remove peel from top and bottom, and stuff with combined

raisins, dates, 1/2 cup corn syrup and

1/2 cup currants, and pour around apple

syrup. Bake in greased muffin pan in hot oven, (425 degrees F.) for 30 minutes.

12 muffins.

Huckleberries can be substituted for the raisins, or 1/2 cup raisins and 1/4 cup nut meats can be used.

GRAHAM WAFFLE MIXTURES

6 Christie's Graham Waffles

2 tablespoons sugar

1/2 teaspoon salt

2 tablespoons butter

1/2 cup milk

2 teaspoons baking powder

5 cup seedless raisins (*)

Crumble Graham Waffles, add sugar, salt and melted butter. Beat

milk and pour over Graham waffle mixture. Bake in greased muffin pan in hot oven, (425 degrees F.) for 30 minutes.

12 muffins.

Huckleberries can be substituted for the raisins, or 1/2 cup raisins and 1/4 cup nut meats can be used.

Identified By Rhythm

One of London's best roof-spectators

is guided by the rhythm of German

engines. According to him, the Hein-

rich engine says slowly, "I'm Gearing."

"I'm Gearing." The Doornier rhythm

is "Where Will You Have It? Where

Will You Have It?" The big Junkers

88 repeats, "I'm Coming, I'm Coming, I'm Coming."

Much American telephone equipment

is being installed in China.

UNION JACK STILL FLYING

Fing Flutters Proudly On Building

Which Was Twice Bombed

A big Union Jack, the top of Burlington

Avenue, London, early on Sept. 17, fell almost exactly where a

previous one had dropped a few nights before. The second did not do damage

from the first and started a small fire, which was quickly put out,

reports the Daily Sketch in London. By one of those freaks that may so often

be noted in damage done by high explosives, a small Union Jack about the size of a handkerchief was left

floating at the end of a piece of string above the worst of the wreckage of the first bomb.

REGISTER OGDEN'S!

British Admiral Met Pile and Offers in Service Club

First in the queue at the cash desk in the United Service Club in London

one day recently was Admiral Sir Roger Keyes, hero of Zeebrugge.

Having picked up his change, he

looked round and noticed just behind

him two French air pilots and a

French naval officer, wearing the

Cross of Lorraine. This shows that

they form part of General de Gaulle's

forces of Free Frenchmen. Sir Roger

Keyes made a little bow and

shook each by the hand saying what

pleasure it gave him to see them in

the club. Then a high naval officer

with Sir Roger told these officers who

had thus welcomed them. The French

men, all war-scarred veterans, blushed

with pleasure. They stated later that nothing since their arrival

in England had touched them so

deeply.

Jobs Open In Radio

Necessary Training Can Be Acquired

Through Radio College Course

We have seen advertisements for

radio men—the Government is anxious

to get them to work in the war effort—and the supply is limited. One

splendid way to get the necessary

training fast is to study with the

Radio College of Canada, write them

Department W.N.T. 84 at 54 Bloor

St. West, Toronto, and they'll send you all details immediately.

On another page in to-day's issue is

an advertisement giving more details—the main fact is that jobs are

open for well trained radio men in

many different locations. You don't

even have to go to Toronto if you

are interested, but can take home

courses and pay for them on easy

terms.

We strongly recommend Radio

College of Canada as a successful

school which has for years carried

out every premium made. All its ad-

missions are passed on by the Department

of Education for Ontario before being

published.

Glad To Surrender

When a German plane came down

on a farm in southeast England the

farmer, armed with a revolver and

pistol, ran to capture him. "You

want a revolver for me, the pilot said

in good English. "That

said my brother for refusing to let Eng-

land."

damage from the first and started a small fire, which was quickly put out,

reports the Daily Sketch in London. By one of those freaks that may so often

be noted in damage done by high explosives, a small Union Jack about the size of a handkerchief was left

floating at the end of a piece of string above the worst of the wreckage of the first bomb.

Londoners who passed along Burlington-street

on Sept. 17 saw the Union Jack still

flying proudly in the wind. "That

time it seemed to remain there only

by a miracle.

Jobs Open In Radio

Necessary Training Can Be Acquired

Through Radio College Course

We have seen advertisements for

radio men—the Government is anxious

to get them to work in the war effort—and the supply is limited. One

splendid way to get the necessary

training fast is to study with the

Radio College of Canada, write them

Department W.N.T. 84 at 54 Bloor

St. West, Toronto, and they'll send you all details immediately.

On another page in to-day's issue is

an advertisement giving more details—the main fact is that jobs are

open for well trained radio men in

many different locations. You don't

even have to go to Toronto if you

are interested, but can take home

courses and pay for them on easy

terms.

We strongly recommend Radio

College of Canada as a successful

school which has for years carried

out every premium made. All its ad-

missions are passed on by the Department

of Education for Ontario before being

published.

Glad To Surrender

When a German plane came down

on a farm in southeast England the

farmer, armed with a revolver and

pistol, ran to capture him. "You

want a revolver for me, the pilot said

in good English. "That

said my brother for refusing to let Eng-

land."

Artists Of Britain To Make Accurate Record Of Phases Of The War

(By Eric Newton, Distinguished Artist, Critic of the London Evening Standard.)

There is no lack of wall-space at the National Gallery in London, but if the artists of Britain were to make an adequate record of a war that extends from the Arctic Circle to the Gulf of Aden, from miles above the surface of the earth to fathoms below the surface of the sea, from the domestic fireside to the front line trench, the National Gallery would be full to overflowing.

War on so vast a scale, war that so closely affects the life of every Briton from the combatant to the infant in arms is worth taking some trouble to record and, in its visual aspects at least, it is being worthily recorded. Paintings and drawings by British artists (some officially appointed by the government, others working independently) already fill three rooms at the National Gallery, and as one looks at these paintings the war, in all its strangeness be- gins to take shape.

It is no easy matter, this painting of war-pictures. It is not just a question of painting bombs bursting and aeroplanes crashing in flames. That is only the surface. Modern warfare is subtler than that, and more far-reaching in its effects. A war-picture may just as truly depict a baby or a land-girl as a Spitfire or a submarine. What really matters is that, whatever its subject, it should reflect a nation stirred and tense, a people with its muscles awake, feverishly active, eager for victory yet willing to wait patiently for it and (since it is the British people who are involved) a people capable of doing and suffering without losing their sense of humor and kind- liness.

Such certainly is the impression that most of these paintings leave on the mind. Not all of them, of course, for not every artist is as skilful he may be as a painter, but the sensitiveness to catch the under- tones of war. But the best of them have done so magnificently.

As far as subject matter is concerned the pictures divide them- selves into five general groups: the war at sea, the war in the air, the war on land, the war in the air, the war on land, the war in the air, the war on land.

Mr. Dundall has concentrated on the war and violent confusion in the air and on the sea, with the world's biggest air force held at bay, the long lines of waiting men gathered along the sand-dunes, and the air- craft as cold surfer half hidden by the pall of smoke from the burning town. Mr. Ehrich has chosen to paint it in full sunlight against a

cloudless sky; a scene of order, purpose, activity. Hundreds of im- proved organization which the bursting bombs from unseen aeroplanes fly vainly to disturb.

The British Navy probably never plunged into a more uncan-ny adventure than that of Norway, and Mr. Davidson has seized with both hands this unique opportunity for painting these heroic scenes against a back- ground of twilight and a lurid mid- night sun. The massive silhouette of the giant aircraft-carriers with their lights blazing, the scurrying destroyers leaving a ghostly green wake behind them, setting out from Scapa Flow in the dawn or forcing like ferries into rock-bound fjords are among the most impressive pic- tures in the exhibition.

Almost as memorable is a set of water colors by Paul Nash of de- stroyed German aeroplanes. Paul Nash is well-known for the strangely poetical mood he evokes. These water colors are as full of poetry as anything he has ever done, and yet they are a literal and accurate record. He has chosen six out of the many hundreds of wrecked German planes that litter the face of Britain. They have the air of uncouth pre- sented, the most important of the superior speed and skill of their enemies. One lies helpless in shallow water, another sprawls in gawky fashion beneath a cliff, another is scattered fragments on a moor, an- other has torn itself to pieces among trees.

I wish I could describe in detail the hive-like activity depicted in Mr. Anthony Crowe's picture of recruits training in London after the Dunker- que evacuation. The picture is set on the parade ground or exercising in the gymnasium: the drawings by Edward Ardizzone of the British soldier in France, full of boisterous good humor and high spirits; the drawings by Raymond McGrath of the lovely yet terrible machine of aeroplanes under construction; the almost incredible detailed drawings of Major Sir Mervyn B. of the British Ex- peditionary Force landing at Dover after their Dunkirk adventure, and of the men of Ajax and Exeter parading in London after their vic- tory over the Great Spite. Eric Kennington's portraits of generals, statesmen, petty officers and stokers, all of them looking like men keyed up to a great occasion and facing it with unaffected confidence.

It is in an inspiring exhibition. Taken in detail it is an honest record of the thousand facets of war in 1939 and 1940. Taken in the mass it is a tri- umph of a nation that, known what freedom means, is resolved to keep its own intact and, when the time comes, to reveal to freedom the least least fantastic nations who have been temporarily robbed of it. Also it is a testimony to the enlightenment of the man-of-the-street, to the artist as an indispensable servant of the state and has the courage to choose the most imaginative and ad- venturous of them.

Story Of Creation

May Be Now Unfolding On The Planet Venus

One of the world's outstanding scientists thinks the story of crea- tion may be unfolding now on the planet Venus.

Dr. H. Spencer Jones, astronomer royal of Great Britain, stays in a review published by the Smithsonian Institution, there is strong evidence that rudimentary forms of life, such as tiny plants and animals, are developing on the earth's nearest neighbor in the heavens.

It appears that conditions on Venus to-day are approximately those which prevailed on the earth about 1,000,000,000 years ago. Dr. Jones adds that there is some evidence also that life might exist in some form on the satellites of stars similar to our sun.

Something To Remember

We must not forget when we look at pictures of wrecked London homes and other buildings that great has been the damage London is a tremendous place and there is no news in pictures of buildings which remain unscathed as in the case with the vast majority of London struc- tures.

Hills of corn, instead of acres, are used to measure farmland in Hyde County, N.C., with an acre being equal to 2,700 hills of corn.

Caribou, rubbing against telephone posts and getting tangled in wires cause telephone trouble in Mount McKinley National Park.

New Plastic Veneer

Will Give Housewife Better Protection For Her Favorite Furniture

Manufacturers in Chicago presented furniture with an "armor" of plastic veneer as a comforting innovation for a housewife driven to tears over cigarette burns or alcohol stain on her favorite coffee table.

The makers said the plastic veneer on the pieces which made their debut at the Fall National Home Fur- niture Show in the American Fur- niture Mart is impervious to fire, water or scratches.

The new material, claimed to be 70 times stronger than wood, is used not only on tables, lamps and children's pieces, but on upholstered furniture and complete dining and bedroom suites. In fact, the show has a complete "house that plastic built."

Needed Help

Speaking of the new Nazi ally in Asia, Thomas Rickard, Henry in the Toronto Telegram says it reminds him of the reply of the man of the careful race who was asked what he thought of the German, Italian, Japanese alliance, "Well," he said, "I never heard of telling in a new partner when business was good."

Queen bees cannot digest pollen in its natural state. They are fed specially digested food by the worker bees.

A full day's fog, it has been estimated, costs the city of London more than \$4,000,000 in normal times.

AN OPTICAL ILLUSION
—Thomas, in The Detroit News

Now Command Respect

England's Chimney Looking Balloons Are Doing Very Efficient Job

London's big balloons were a joke a year ago—expensive toys, theatrical props of a nation playing va- rious tricks to come down in the first shower of machine-gun fire.

After weeks of day-and-night raid- ing and many showers of lead, the balloons are still there. Last year's jokers now respect them as sentinels in silver, a menace to bombers.

The Air Ministry gives them credit for doing their job. The job is to rule out dive-bombing and keep the enemy at a distance, high enough for anti-aircraft guns and fighter planes to get to them.

They're not without big bags of carefully sewed and pumped Ex- tian cotton fabric filled with hydro- gen, but Londoners are delighted to dote on their animal ways.

The Nazis might have called them silly-looking gas bags in the long months before the battle, but one of the earliest "all out" raids on this country was aimed at balloons alone.

They've had their bad moments. A few have been shot down. Some have snapped their cables and gone trailing over power lines as far as Finland, others have managed enemy planes.

They've had unexpected good mo- ments. One balloon was a nice cushion for an airman descending by parachute near Hyde Park. He and the balloon were hauled down safely.

For risking her life to save others during an air raid, 19-year-old Soia Vera Corley Stray has been given the newly-created George Cross which is awarded for deeds of gal- lantry by civilians under fire. She is shown at her post as a "spotter" watching for the first sign of Ger- man air raiders.

Lack Of Feed

Swedish farmers have killed an un- usually large number of cattle this fall because of the difficulty of ob- taining fodder, domestic or imported.

Exclusive Scarf In Various Lengths

The new material, claimed to be 70 times stronger than wood, is used not only on tables, lamps and children's pieces, but on upholstered furniture and complete dining and bedroom suites. In fact, the show has a complete "house that plastic built."

New Anesthetics

Can Now Be Styled To Suit Each Individual Patient

A new medical science, anaesthesia styled to fit each individual patient during a surgical operation, was de- scribed to the American College of Surgeons at Chicago.

In some of the most progressive institutions of the United States, it was shown, the anaesthetic may even be changed from time to time during a single operation, to fit the pa- tient's response or the surgeon's momentary need for more complete numbness of organs near his in- struments.

This new science of styled anes- thesia comes from two fairly recent developments. One is the rise of a profession of scientifically trained men and women who devote all their time to study of anaesthesia.

Dr. Virginia Apper, of New York, said that her group is trying to do what is known as continuous spinal anaesthesia. This is the shot in the spine, which stops feeling in part of the body, but leaves the patient con- scious. The usual way is one massive shot of anaesthetic. The effect lasts two or three hours, too short for some operations.

It is dangerous to give a bigger shot. So the anaesthetists are using a continuous drip of small amounts of the anaesthetic into the spine all through the operation. This pre- vents the lack of feeling indefinitely.

Dr. Apper said that in more than 50 cases, no bad effects have been noticed, but that more trial would be necessary.

Dr. F. W. Hartman, of Ford Hos- pital, Detroit, showed that all anes- thetics reduce the brain's ability to use oxygen and that some cut the brain oxygen to a dangerous limit. He said that alcohol, in excess, has the same effect on the brain as the anaesthetics which are the every- day in this respect.

Origin Of The Orange

Several years ago, a Chinese un- dertaker's agricultural department be- gan studying possibilities of raising Sunkist oranges in China, and dis- covered that Chinese ate oranges for dessert when Europe existed on a one-course, uncooked meat menu, traced the orange's circumnavigation of the globe from China through In- dia, the Mediterranean and Amer- ica's Florida and California back to its native China.

Britain's Amazing Recovery Has Restored Confidence Among Neutral Nations

(By Maj.-Gen. Sir Charles Gwynn)

Watches River For Raider Planes

Enemy Very Warm Reception

A new branch of the Royal Navy, the river forces, has been set up to watch the Thames, guards by day and night the Thames highway to London.

For the most part civilians three months ago, the members of the river patrol, to-day are part of His Ma- jesty's navy and their job includes spotting air-borne invaders.

Going on an all-night trip with one of the patrols, we were a little shaken when we reached the lock. Overhead dawned the night's first wave of Nazi raiders. Behind us al- ready fires glowed red against the sky.

Across the Thames smoke billowed from behind a historic public build- ing. Before us lay the river shimmer- ing under the moon.

Twice, en route to the pier, I had to flatten myself against the nearest wall when bombs crashed. A little girl ran wildly down the street and took her place beside me as a big one screeched overhead. I don't know we made ready to shove off and chatted easily about the work of his force.

An enemy attempting to come up the river would get a very warm re- ception," he said.

The boat was in motion when a German plane dropped four para- chute flares over our right. One, unopened, plummeted to earth. Two, not only burst but landed in the water. A third, unopened, was still in the air. The fourth, unopened, was still in the air.

The gunner on our boat brought down two of the flares and the third one collapsed before it could well light the target for the ruler above.

"There's a bit of action for you," the commander said. "Not bad shooting when you remember that these fellows were civilians three months ago."

Empress Of Britain

Memory Of This Splendid Vessel Was Long Survive

The New York Times, commenting editorially on the loss of the Cana- dian ship liner Empress of Brit- ain, said:

"No ship ever fitted her name more truly than the Empress of Brit- ain. She was indeed an anglopho- bous and grace and dignity in the every inch of her. She had millions of devoted subjects. In many coun- tries she was primarily a cruise ship, and she had been seen and ad- mired in more out-of-the-way har- bors than any other liner. Her white and gold stripes, her coat of arms, her apart from the throng. It was always a thrill to see her, in the blue Mediterranean or in more distant parts of the world, it was always an event in our harbor when the great white Empress came in.

"She had many proud moments in her reign of only a decade, nothing when she brought the King and Queen home from Canada. But we suspect that the proudest of all were the months when the Empress wore her uniform of gray in wartime ser- vice. She carried thousands of troops from the free dominions to the old country; she played her part in keep- ing England free. She now lies blackened and twisted on the ocean bottom, the largest of all the ships that have gone down in this war; but she lives up to the traditions of her flag to the very end, for the Ad- miralty has praised 'the resolute and efficient handling' of her anti-air- craft guns in her death struggle. The memory of this fine ship will survive until a new Empress of Brit- ain inherits her name."

Canadian Navy

Twelve Canadian Doctors Commis- sioned As Surgeon-Lieutenants

Hon. Angus Macdonald, navy min- ister, announced that 12 young Cana- dian doctors had been commissioned as surgeon-lieutenants in the Royal Canadian Naval Volunteer Reserve and sent to England for a period of training in the Royal Canadian Naval Hospital in Portsmouth.

They are the first Canadian medi- cal men to be sent overseas as mem- bers of the Canadian navy service. The medical officers include: W. Locks and J. L. Silverdale, Winnipeg.

Looking back on these four months, the British have seen a recovery both in itself and in the world's estimation. It is surprising that confidence has been restored, and that a similar opinion has been im- pressed.

The moral and material assistance which the Empire's efforts have seen from its friends is perhaps the most reassuring tribute that could be paid to them.

WORLD HAPPENINGS BRIEFLY TOLD

Greek residents of Montreal have contributed more than \$8,000 toward a fund for war planes for Greece.

Children of Victoria, B.C., cabled \$1,337 for the Lord Mayor's London Air Raid Distress Fund.

Nearly 100,000 skilled engineers are to be diverted from engineering work in non-essential factories to ports in munitions and heavy industry production in Britain.

Queen Elizabeth paid tribute to the bravery of the Women's Auxiliary Air Force in a visit to a station of the Royal Air Force fighter command.

A 4800-word diary written by George Washington in Philadelphia in 1779 has been sold for \$10,000 from the library collection of the late John Gribble of Philadelphia.

Italy has lost 29 submarines, or one-quarter of her total underwater strength, since she entered the war, the British Broadcasting Corporation states.

Gift of \$44,000 to Britain for the purchase of fighter planes was announced by the minister of finance, H. H. Woodhouse, at the opening of the national assembly.

Postmaster-General Mackenzie announced that the postal office cash-on-delivery charges on mail matter posted in Canada has been reduced from 15 cents to 10 cents on amounts up to and including \$2 in value.

Dependents' allowance cheques now are given regularly to 117,000 Canadian homes, compared with 100,000 last August, it was stated by Arthur McNamara, chairman of the Dependents' Allowance Board.

Underground Hospitals

Two Somewhere in England Which Nazis Cannot Bomb

In southeastern England—Here in Britain's front line, there are two hospitals the Nazis won't bomb. One is a hospital deep in the earth and rock—one an improvisation of old mine workings, the other dug by men of the Royal Army Medical Corps.

In the one that was cut by a generation that never dreamed man would conquer the earth, the captain planned with pride his anti-gas arrangements, his operating theatre with enamelled walls, sterilized cases, hot and cold water system and brilliant lights.

Four casualties lay on white beds in the hospital ward, and in another section were drugs, food and water, enough to last a fortnight.

The other underground hospital was carved out of earth and rock by medical corps men who a few months ago knew nothing of tunneling.

Next to the reception room is a well-equipped first dressing station. Further along the tunnel is an air-locked entrance to a vast underground. Rows of numbered cases contain all emergency water supply.

Niches cut in the operating room walls hold instrument cases and sterilizing cabinets. Past the operating room the tunnel widened to form a ward in which stretchers hang bunk-like from the sides. Fresh air circulates throughout, driven by fans.

Nothing went to waste in the cave-hospital's construction. Up on top is a vegetable garden planted in earth excavated from the tunnel. It also provides a perfect camouflage.

Would Drain Lake

Largest Body of Iron in Canada Under Deep Rock Lake

The Toronto Telegram said it had learned at Queen's Park that Deep Rock lake, located about 135 miles from Port Arthur, may be drained so that a large ore body beneath the lake can be mined to meet the increased demand for iron ore.

The story said that development work is already proceeding at the lake, "under which is said to lie the largest and finest body of iron ore in Canada."

At the present time the lake is used as a power source by the Ontario Hydro Electric Power commission to supply the district.

Polyglot Language

Swiss philologists are seeking to have "Matten English" recognized as an official language at Geneva. It is a polyglot language evolved by mercenary Swiss soldiers of the middle ages, and has traces of every tongue.

Red Cross Activities

Peace Time Duties Being Carried On In Addition To War Work

Normal peacetime duties of the Canadian Red Cross society are still being carried on along with those of the war in the Saskatchewan division.

The nine outpost hospitals—at Bracken, Carleton Place, Loom Lake, Rockglen, Padackowood, Tuberose Pierceland and Hudson Bay Junction, the latest opened in January last—have this year admitted approximately 1,500 patients.

In the Junior Red Cross hospital in Regina—the only special hospital for children in the province, and devoted to the free care of crippled children of parents whose finances could not accomplish the heavy outlays required—there have been approximately 100 cases admitted in the same period.

Various other duties include: maintenance of 13 Red Cross highway first aid posts; for those in need of artificial limbs and without funds; special cases of ex-servicemen of the last Great War, ill and without pension; and still other extreme cases of illness, ineligible for aid under the law from their financial position.

Of every Red Cross dollar donated, only 14.5 cents are required to carry these duties forward along with those of the war.

Turning to the war-work front, the shipments of goods to the national warehouse in the east total so far: 68,517 pairs of socks, 7,489 sweaters, 32,668 pyjamas, 18,768 bed gowns, 3,699 pneumonia jackets, 300 bed pads, 3,718 triangular bandages, 2,082 abdominal binders, 304 corsets, 3,956 scarfs, 756 dressing gowns, 162 day shirts, 600 mitts, 324 helmets, 234 bed jackets, 42 shawls, 372 children's garments, 14,976 refugee garments, 3,597 quilts, 0,744 blankets. Besides the foregoing shipments have been made to army units in Saskatchewan: 4,884 pairs socks, 481 scarfs, 78 pneumonia jackets, 72 pyjamas, 48 bed gowns, 40 dressing gowns, 90 sweaters, ice bag covers, bed pad covers, bandages, socks, rugs, curtains.

HOME SERVICE

HOW TO LEARN THE PIANO THIS EASY SHORT-CUT WAY

By B. D. F. G. A. B. C.

Hundreds of Thousands Helped in Construction of Burma Road

The almost fabulous Burma Road, which has been reported by the British government, is not only a lifeline of the struggling Chinese Republic, but is an heroic monument to the unending heroism of that republic's tireless, smiling, anonymous code, says Richards Watts, Jr., in the New York Herald Tribune. The road which stretches from Kunming to the capital of Yunnan Province, to Lashio, the railroad in what is geographically Upper Burma, a distance of 700 tortuous miles through mountains, across gorges and into occasional beautiful valleys, is likewise a tribute to Chinese engineering skill and the hundreds of thousands of coolies, many of whom did not even know a war was going on, who are the heroes of this great construction job.

Tapiscia is made of the root of the bitter cassava. In its natural state, this root is poisonous.

Monument To Coolies

Instead of slumping along with other consumer industries, says Newsweek, the British toy industry is busier because of the war, having taken over many of the markets formerly supplied by Germany.

Other firms now are thinking up new slogans for their packing cases so that a variety of messages may be sent overseas with their goods.

Some suggestions are: "Navy guarantees safe delivery." "Germany could not send you this."

"Starving Britain" can spare you this."

"Your country would like this; you can have it."

"Britain's answer to Nazi 'blockade'."

Toy Business Booming

Little or no vitamin C is lost when tomatoes are home-canned by the cold or the hot-packed method, tests show.

A small paint brush is very handy to brush crumbs out of the electric toaster.

One firm in Phoenix, Ariz., makes and sells sun stoves, which cook meals by the heat of the sun.

The alert modern woman makes a habit of "keeping up appearances" the clock round. You'll look your smartest even at home in this Ann Adams housecoat, Pattern 4507.

A full-length panel gown with a front with slanting effect, while another creates an illusion of the back skirt. Pointed side-front waistlines are placed high to hold becoming softness up through the bodices. Isn't the collar youthfully young? It is in light cotton. It is in red. Add gay color to sleeves, collar and perhaps even the waist—trimming. Your sleeves may be long or short. Let the Sewing Instructor help you choose.

Pattern 4507 is available in misses' sizes 14, 16, 18, 20, 22, 24, 26, 28, 30 and 32. Size 16 takes 3 1/2 yds. 36 inch fabric and 2 1/2 yards ribbon.

Send twenty cents (20c) in coins nearly all his life, and even knew how to make shoes last almost indefinitely. William Allingham told now when he and Browning died with him one evening the poet laureate talked of boots and how to preserve them, and by way of illustration exhibited a pair of shoes which he had had in wear for 40 years.

Glass has been developed for windows in atmosphere airplanes to absorb invisible ultraviolet rays at high altitudes that cause sunburn in a few minutes.

MORE PROTECTION FOR SOLDIERS

Nazi Army Distribution

A Lot Of Troops And A Lot Of Territory To Cover

Germany now had about 855,000 troops stationed within striking distance of Great Britain in addition to 225,000 stationed in and near Scandinavia, a responsible non-British military authority said.

British sources reported that about 70 German divisions, or 1,600,000 men, were stationed in southern Germany, Austria and Slovakia, ready for a possible blow at the Balkans.

The non-British informant reported that the remainder of the Nazi army was distributed as follows:

Central Germany: 70 to 75 divisions, or up to 1,125,000 men.

In and near Scandinavia: 15 divisions of 225,000 men.

Britannia: 15 divisions.

Normandy: 12 divisions or 180,000 men.

Belgium: 12 divisions.

Calais, Boulogne and channel coast generally: 18 divisions, or 270,000 men.

Britain's Trade Slogans

Exporting Films Are Decorating Packaging Cases With Messages

The slogan "Britain Delivers the Goods" will be reproduced on packing cases of thousands of exporting firms to give the German propaganda that British overseas trade has been brought to a standstill.

A Bradford textile firm has been brightening its export packing cases with a stenciled reproduction of the Union Jack above the slogan and the export council of the board of trade is sending reproductions of the stencil to other firms in the 270 export groups in Great Britain.

The slogan also has been translated into Spanish and Portuguese for the South American markets.

Other firms now are thinking up new slogans for their packing cases so that a variety of messages may be sent overseas with their goods.

Some suggestions are: "Navy guarantees safe delivery." "Germany could not send you this."

"Starving Britain" can spare you this."

"Your country would like this; you can have it."

"Britain's answer to Nazi 'blockade'."

Glass has been developed for windows in atmosphere airplanes to absorb invisible ultraviolet rays at high altitudes that cause sunburn in a few minutes.

Two vigorous indulgence in athletics, too many parties, continued late hours, insufficient rest and sleep and repeated spells of sickness all contribute to a weakening of the resistance of the human body and assist in the spread of tuberculosis.

This statement was made by Dr. Gordon Jackson, Medical Officer of Health for Toronto. His department is conducting one of the most extensive and comprehensive surveys ever held to discover the incidence of tuberculosis among pupils of high school age. The survey is being made in a number of secondary schools in Toronto.

"Only the tubercle bacilli can cause tuberculosis," said Dr. Jackson. "But overwork, strain, disinclination, hard times, impure food, discouragement and similar burdens are the fifth columnists which prepare the way and make the path easy for the tubercle bacilli which occurred in Toronto last year, in the age group 15 to 20 years, 15 per cent. were those of females and only 15 per cent. were males. It may be noted that in the accepted high school group, 15 to 19 years, 15 per cent. were those of females and only 15 per cent. were males. The deaths were 21, times greater in the women to boys, and that these younger age groups supplied approximately 25 per cent. of the total deaths for the city of Toronto."

Dr. Jackson was asked to predict how many of the pupils examined in the present survey would have a positive reaction. He said: "We don't know. It shouldn't be more than 20 per cent. of those tested; it probably won't be less than 10 per cent. In 1,000 pupils that would mean 100 reactions will be found."

A Magic Trick

Britain Carrying On Normal Business While Engaged In War

Le Soleil, Quebec, says: The least open to the English economist Mr. Maynard Keynes, admitted recently that the admirable management of the British Government is the reason for its success in the war.

He said he himself was in doubt. While England is repulsing the advances of the German air power and while she is carrying the war into Germany, she continues to import, to produce, to sell and to deliver her merchandise to all her clients in the Empire or foreign countries. She has spent in one year for her defence and counter-offensive more than she spent from 1914 to 1918. (This time she has not had to lend billions to her Allies). And she is entering the second year of the conflict with a program that will be still more costly. But John Bull knows where to get the funds for this magnificent effort.

Easy On His Clothes

Tennysen Seemed To Understand How To Make Them Last

The Manchester Guardian says: It is a pity, now that we are expected to make our clothes last longer, that we cannot look for a tip or two from Tennysen, for the poet seems to have been remarkably successful in such matters. He wore one favorite cloak nearly all his life, and even knew how to make shoes last almost indefinitely. William Allingham told now when he and Browning died with him one evening the poet laureate talked of boots and how to preserve them, and by way of illustration exhibited a pair of shoes which he had had in wear for 40 years.

Glass has been developed for windows in atmosphere airplanes to absorb invisible ultraviolet rays at high altitudes that cause sunburn in a few minutes.

BUT HOW ABOUT THE GROUND FLOOR?

—Manning, in the Arizona Republic.

PREMIERS ASKED TO CONSIDER THE SIROIS REPORT

Ottawa.—Early action on the sweeping recommendations of the royal commission on Dominion-provincial relations is urged by Prime Minister Mackenzie King in a call sent out for a Dominion-wide conference in January to consider implementation of these recommendations.

Invitations to take part in the conference were sent to the premiers of all the provinces, the prime minister announced to the House of Commons.

Expressing a government opinion on the commission's report for the first time since it was submitted last May, the prime minister said it "commends itself strongly to our judgment" and that no time should be lost in arranging a conference regarding it.

"It is the view of the government that adoption of the commission's recommendations is necessary to put our country in a position to pursue a policy which will achieve the maximum war effort and, at the same time, lay a sound foundation for post-war reconstruction," Mr. King said in his strongly worded letter to the provincial premiers.

"Text of Prime Minister Mackenzie King's letter to the provincial premiers follows in part:

"As you are aware, the report of the royal commission on Dominion-provincial relations was presented to the government of Canada on May 14, 1940. Although it was not possible to study this report immediately upon its receipt, my colleagues and I have availed ourselves of the opportunity offered by the adjournment of parliament on Aug. 7, to give to its recommendations the most careful consideration.

"The report commends itself strongly to our judgment. We believe that no time should be lost in arranging a conference with the provinces, in order to secure, if possible, the adoption of the commission's recommendations.

You will recall the circumstances which, in 1939, led to the creation of the Rowell-Sirois Commission. It was appointed because of general dissatisfaction in respect of Dominion-provincial relations and arrangements—a dissatisfaction which reached a critical stage during the depression. The inability of local and provincial governments to deal with mass unemployment and agricultural distress, and the resulting financial difficulties and controversy in regard to policy and administrative responsibility, constituted admitted evils and a serious strain on national unity.

The necessity, under existing constitutional authority, of maintaining local responsibility for relief, precluded the development of policy on a national scale, and produced a situation which seriously affected the morale of the unemployed and destroyed the financial stability of many local governments. In the emergency the Dominion made large contributions for relief purposes but could not assume full or permanent responsibility for unemployment nor can it do so, unless measures such as those contemplated by the commission are agreed upon.

Union Now Movement
Establishment Of A Permanent Organization In Canada
Toronto.—Goldwin Gregory of Oakville, Ont., author, and acting secretary of the provincial organizing committee for the "Union Now" movement in Canada, said that establishment of a permanent organization in the Dominion depends on voluntary financial support.

"Union now," the plan of Clarence K. Streit, former New York newspaperman, for a federal union of democracies, was launched nationally in Canada with an organization meeting and a meeting of the provincial committees.

Order Was Rescinded
British Women And Children May Stay In Hong Kong
Hong Kong.—Orders for compulsory departure of British women and children from Hong Kong have been rescinded on instructions from London, an official announcement said.

The announcement that those remaining here would not be compelled to leave was interpreted as meaning that British apprehensions of a crisis in the Pacific are lessening.

Master Gauges

Pays Tribute To Skill And Ingenuity Of Canadian Craftsmen
Ottawa.—Canadian craftsmen and engineers in 50 shops are turning out highly complicated "master gauges" for guns, shells, tanks, aircraft and other essentials of the Dominion's wartime program, Munitions Minister Howe said.

The minister's statement said the number compared with "only two or three shops" capable of turning out gauges to a precision of 1-10,000ths before the war began.

"The highly satisfactory output of these precision gauges is a tribute to the skill, ingenuity and spirit of Canadian craftsmen and engineers," Mr. Howe said.

"We are finding that Canadians are highly adaptable, and that young men and women can be trained for the most exacting work and can attain astounding skill."

"We have had the utmost co-operation from manufacturers in the rapid expansion which has been necessary in this vital phase of the war effort."

Mr. Howe said more than 4,000 shops of gauges now are being made in Canada.

Should Report

Fit Single Men Should Notify Division
Ottawa.—Physically fit single men of 21 and 22 years who did not receive calls for compulsory military training during the second training period should notify their divisional registrars, a war services department official said.

Failure to notify the cards or changes of address may have accounted for some eligible men not receiving calls for the war effort.

Under new regulations changes of address must be communicated to the Dominion statistician at Ottawa by the divisional registrars of the war services department.

All eligible 21-year-olds listed, 22-year-olds at the time of the last census have been called, a press release from the war services department announced.

Recruits seeking postponement of training on medical grounds have eight days in which to make applications to their divisional registrars.

Raid Repals

Noise Bombs An Britain's Reply To Hitler's Screams
London.—An anonymous British inventor has drawn up plans for what he called a "Bronx cheer" noise bomb as Britain's reply to Hitler's "screamer" bombs.

The inventor pointed out that Hitler's "screamer" bombs were the bomb first used by the Germans produced the terrific screaming noise intended to frighten the population of London. He said that the "screamer" bombs are overheard.

In reprisal, he suggested the British attach their bombs to "small rubber vibrators that small boys and prize fight fans use to produce uncouth sounds."

The inventor said "would be a 5,000-foot Bronx cheer or raspberry, expressing—all the way down the line—the contempt for the war that the Nazis can do."

Underground Life

Would Feed Londoners In Daylight
Above Ground
London.—Violet Markham, deputy chairman of the London assistance board, declared that the only way to stop some Londoners from leading an almost complete underground life was to feed them in daylight above ground.

The chairman was in favor of making them "come up to eat or they might become 'mini' troglodytes, afraid of the sun, moon, air and sky."

This pronouncement followed on the heels of the institution of feeding facilities in underground tubes for the nightly occupants.

Italy's Submarine Losses

One Quarter Of Her Total Underwater Strength Has Disappeared
New York.—Italy has lost 29 submarines, or one-quarter of her total underwater strength, since she entered the war, the British Broadcasting Corporation said in a broadcast heard by the National Broadcasting Company.

This figure included two submarines which the admiralty announced recently had been sunk. (Jane's Fighting Ships gave Italy 104 submarines as of September, 1939.)

The Italian entered the war in June and no authoritative figure on her submarine strength since then has been given.

C.P.R. Scholarships

Free Tuition At McGill University Offered Again This Year
Montreal.—Two scholarships providing for free tuition at McGill University in several faculties and schools are offered again this year by the C.P.R. It was announced by D. C. Coleman, vice-president of the C.P.R., Montreal.

Subject to competitive examination, the awards are open to all apprentices and other employees of the railway under 21 years of age and to minor sons and daughters of employees. The scholarships are part of a wide educational program sponsored by the C.P.R.

BRITISH PRESS PAYS TRIBUTE TO U. S. PRESIDENT

London.—The Daily Mail, paying tribute to President Roosevelt on his re-election, said "he must be named with Hitler and Mussolini" as one of the select company of really great American presidents.

"His re-election is a heavy blow to Hitler and Mussolini. Two of the best hated names in the axis calendar are those of Franklin D. Roosevelt and Winston Churchill," the newspaper said.

"The dictators have seen them because they fear them... The immense prestige of Mr. Roosevelt's return to office will be to speed up war supplies for Britain. He may examine other possibilities of assistance; we may hope that he will be able to tackle financial problems. The form of help for which we stand ready is not clear."

The News Chronicle commented: "The re-election of Mr. Roosevelt will be heralded with joy wherever the championship of free men is held sacred."

"That he should have been chosen against the tremendous unbroken tradition opposed to a third consecutive term shows how the immense historic occasion is felt by the electors."

"Wilkie might have made a very good president—perhaps he will do so in some future term."

"Roosevelt is in a unique position among presidents of the United States, having nothing whatever to fear for his future (a fourth term being ruled out), being thus able to devote himself wholeheartedly to the task of bringing material power and moral weight of his great country to bear against the pitch of efficiency in the great duty of defeating aggression."

"His words and actions tell a story of courageous opposition to tyranny and of the triumph of justice over the weak and oppressed. To them and all who work for them, his success means the triumph of liberty over the tyranny and the better world order is established."

Monkeys Arrive

Toronto.—Three chimpanzees from the Zoological Gardens at London, England, arrived at Riverside zoo for the duration of the war. The Toronto zoo now has four chimpanzees, and more than any other city zoo on this continent.

BOARD MEETS AT OTTAWA
Canadian Service Members of the Joint Canadian-U.S. Defence Board, left to right: Air Commodore A. A. C. Cuffe, Air Member, the Air Staff; Captain L. W. Murray, Deputy Chief of the Naval Staff; Brigadier Kenneth Stuart, D.R.C., M.C., Deputy Chief of the General Staff.

GROUP CAPTAIN J. L. E. A. DE NIVERVILLE

Director of Manning R.C.A.F., who is the highest ranking French-Canadian officer in the R.C.A.F., was recently promoted from rank of Wing Commander to Group Captain.

Manitoba Legislature

House To Meet In Regular Session On November 18
Winnipeg.—Premier John Bracken announced that the Manitoba legislature will meet in regular session November 18.

Mr. Bracken's announcement gave no indication of the legislative program which may come before the house. Political observers believe, however, that the majority of bills will suggest minor amendments to existing legislation.

Setting of the session date followed formation of the province's new non-partisan government. It is expected that Mr. Bracken will announce an election date after the session, with the union government candidates going to the house to face followers who may be selected to oppose the coalition line.

Teach Democracy

Would Train Students In The Principles Of Canadian Citizenship
Toronto.—A plan of youth training in the principles and practice of democracy was endorsed by the executive of the Ontario Secondary School Teachers' Federation, it was announced.

The plan, proposed by Miss Evelyn McDonald, floor colleague, Toronto, would be directed by the federal government, through the provincial departments of education and organized in every secondary school of the Dominion by the teachers' federation.

The training would provide teachers and students with a knowledge of the duties and privileges of Canadian citizenship and of war issues, so that they may make a maximum contribution toward victory.

Dental Convention

Edmonton.—Dentists of the western Canada Dental Society will hold their biennial convention here June 10-12. President Dr. J. M. Dixon of Calgary announced after an executive meeting. Dr. P. W. Winthrop of Saskatoon, first vice-president, and Dr. M. K. Johnson of Winnipeg, second vice-president, attended.

Receive Awards

Eight Western Canadians Receive Certificates From Humane Society
Hamilton, Ont.—Eight persons from western Canada were cited for heroic action in the awards of parchment certificates announced here by the Royal Canadian Humane Association. They are:

Niel Graden and William Szerban, Edmonton, for rescue of John Kondrsky from drowning in the North Saskatchewan river, Edmonton, Feb. 2, 1939.

Arthur Parker, Saskatoon, for the rescue of Dorothy Daniels in the Saskatchewan river, Saskatoon, March 7, 1940.

Shells Chambers and Alfred Savage, Victoria, for assistance in rescue of Frederick MacPherson in Thelus Lake, B.C., Aug. 13, 1939.

John Houston, Nakup, B.C., for the rescue of Louis Genack from death by serious wounds, Nakup Hot Springs, B.C., April 27, 1940.

A. R. Clement and Gordon Linday Mason, Courtenay, B.C., for assistance in the rescue of A. E. J. Frey from drowning at Comox Bay, B.C., July 1, 1940.

Refresher Course

Veteran Officer Pilots To Be Absorbed Into Air Force
Ottawa.—On the theory that an old "dog" dog can learn new tricks, veteran officer pilots of the first Great War will begin refresher courses Nov. 11 at elementary flying schools operating under the British Commonwealth air training plan in Edmonton and Regina.

When their training is finished the experienced flyers will be absorbed into the Royal Canadian Air Force as commissioned pilots assigned to various staff duties.

"These pilots, who served in the first Great War, will begin refresher courses Nov. 11 at elementary flying schools operating under the British Commonwealth air training plan in Edmonton and Regina."

When their training is finished the experienced flyers will be absorbed into the Royal Canadian Air Force as commissioned pilots assigned to various staff duties.

MORE AID FROM U. S. FOR BRITAIN NOW EXPECTED

Washington.—Expanded plans by the United States for aiding Great Britain appeared to be in the making as Secretary of State Cordell Hull called for post-election unity of opinion toward the "principles and practical measures" of President Roosevelt's foreign policy.

"These, Hull said in a statement, gained "nation-wide approval" in the election and "our nation can now go forward with the fullest measure of confidence."

"These, Hull said in a statement, gained "nation-wide approval" in the election and "our nation can now go forward with the fullest measure of confidence."

"These, Hull said in a statement, gained "nation-wide approval" in the election and "our nation can now go forward with the fullest measure of confidence."

ROYAL AIR FORCE AIMS TO CONTROL ENEMY SKYWAYS

London.—The government made it clear the British intend to have full liberty of action in regard to Rome since Italian flyers have joined the Germans in bombing attacks on London.

This unannounced observation on the status of the Italian capital was in overnight raids, the ministry said, the tempo of its counter-attack during the coming winter.

"Nothing short of control of German skyways and a complete 'bomb blockade' of Nazi heavy industry, said one air officer, is the British view and spring aim."

The air ministry reported new bombing thrusts to the outskirts of Berlin, at vital areas far inside Germany, along the blackened Nazi-held coastline.

Industrial plants in Spondan, a Berlin suburb, were heavily attacked in overnight raids, the ministry said, and a railway junction northwest of the German capital also was bombed.

The minister's remarks, it probably were made in the House of Commons. Italy, which had declared Rome an open or undefended city after the war, was the last June 10, joined the aerial attack on London, Oct. 24.

Discussing Britain's winter campaign, information sources said it would be a carefully defined process intended first to destroy German war factories and second to smash the road and shipping facilities that aimed above all else at damaging German morale.

He added that next would come an attempt to gain daylight air supremacy over all Germany.

The publicity campaign "Airplane" suggested that of heavy bombers plus United States-built equipment.

Will Act If Necessary

British Air Marshal Says R.A.F. Prepared To Raid Rome
London.—Air Marshal Sir Philip Joubert said in a broadcast the Royal Air Force "can only do what it probably will do."

Sir Philip, noted soldier and airman, spoke on the British Broadcasting Corporation's "British Speaks" feature.

"It would be a pity to attack Rome," he said, "but if the new air war does not shut steel ourselves to this act of vandalism. It would not be the first time that an aviator from the north has laid the city of Rome in ruins."

Sir Philip credited fear of a possible attack on Rome as a factor in contributing to the apparent decision of the Italians not to participate in aerial attacks on London.

Trans-Canada Air Lines

Heavy Increases Shown In Passengers And Express Shipments
Winnipeg.—Trans-Canada Air Lines carried 6,337 passengers in September. This was 3,820 more than the same month in 1939 but 724 less than August due to the shorter month and falling off in vacation travel. Mail loads aggregated 86,049 pounds, a considerable increase over the previous month and twice the 1939 volume. Express rose from 12,835 pounds in August to 12,776 in September.

In the three-quarter period, the air line carried a total of 38,110 passengers, an increase of 10,000 over the previous year. Mail grew from 326,209 to 626,785 pounds and express grew from 32,410 to 75,704 this year.

Rigorous Sentence
Gorakhpur, India.—Pandit Jwanda Narayan, one of two men chosen by Mohandas K. Gandhi to make anti-air speeches as part of a "No Lethal Force" campaign, was sentenced to three months' imprisonment for failure to appear in court.

A Gesture Of Friendship
Istanbul, Turkey.—Soviet Russia was reported anxious to be seen drawing some of her troops from the Turkish-Soviet Caucasian frontier as a gesture of friendship for this country. The same source giving the information said also that Moscow and Ankara might soon open negotiations toward a new trade agreement.

British Women And Children May Stay In Hong Kong
Hong Kong.—Orders for compulsory departure of British women and children from Hong Kong have been rescinded on instructions from London, an official announcement said.

The announcement that those remaining here would not be compelled to leave was interpreted as meaning that British apprehensions of a crisis in the Pacific are lessening.

Underground Life
London.—Violet Markham, deputy chairman of the London assistance board, declared that the only way to stop some Londoners from leading an almost complete underground life was to feed them in daylight above ground.

The chairman was in favor of making them "come up to eat or they might become 'mini' troglodytes, afraid of the sun, moon, air and sky."

This pronouncement followed on the heels of the institution of feeding facilities in underground tubes for the nightly occupants.

Italy's Submarine Losses
New York.—Italy has lost 29 submarines, or one-quarter of her total underwater strength, since she entered the war, the British Broadcasting Corporation said in a broadcast heard by the National Broadcasting Company.

This figure included two submarines which the admiralty announced recently had been sunk. (Jane's Fighting Ships gave Italy 104 submarines as of September, 1939.)

The Italian entered the war in June and no authoritative figure on her submarine strength since then has been given.

Nothing Is Safe

Nazi Thieves Will Lead Even Supplies From Red Cross

P. J. Philip, an experienced and competent foreign correspondent of the New York Times, recently left France and, back in New York, is writing for his paper the things which never would have been admitted to pass the German censors.

Mr. Philip's story of the systematic looting of occupied France covers familiar ground. The serious shortage of food, of coal, of all the necessities of life, he ascribes to "the deliberate cruelty which is inherent in the Nazi system with its conception that any means are justified if the end can be secured." He adds that in the case of food the Nazi doctrine "is well supported by natural appetite"—says so long as supplies lasted the German invaders feasted like gluttons, that butter to them was such a rarity they ate it without bread, like ice cream, as they walked along the streets.

And the Times correspondent has no confidence whatever that the Americans could feed the French people—as Mr. Hoover said they would—without helping the Germans. Not even Red Cross supplies are safe from the Nazis.

"Every one—including an American—had who, during the past few months, has been engaged by the French Red Cross in the task of taking food to French prisoners—is convinced that, as soon as the backs of the distributors are turned, they will correct official ceremony of handing over the supplies is completed, by far the larger portion of what they bring is sold to the Germans—even sent home to Germany—and not given to the prisoners."

And Mr. Philip adds this comment: "Those who contemplate trying to carry on the humanitary work of relief for the hungry will find themselves compelled first to distribute this question of how they are to distribute and decide whether they will honestly promise either their subscribers or the French people for whom this relief is intended that it will reach the right destination."

If there is suffering in France this winter, and apparently hardship cannot be avoided, it will be the Germans' making, and because the world cannot trust the Germans honestly to distribute goods which might be sent in for the civilian population. The soundest American opinion supports the British position, that the blockade could not be lifted safely. Germany must endure, as Britain is enduring, in their common cause."

Butter Situation

Checking Up On Stocks In Storage In Canada

The wartime prices board, investigating the butter situation, is checking up on all stocks in storage in Canada.

At the beginning of November stocks of creamery butter in cold storage totaled 58,000 pounds, valued against \$7,013,153 pounds on the same date last year. There is no suggestion of a butter shortage, a spokesman for the board said.

However, more butter is being eaten. The consumption is now up by 6,000,000 pounds over last year and prices of wholesale butter in Montreal have received the attention of the board.

Recently prices have risen about six cents a pound and the board finds this attributable to supply and demand. Production in September was lower and the demand greater than usual.

The board now has asked storage firms to inform them how much butter they have on hand, where they got it, what prices they paid and who they are holding it for.

Dairy farmers say prices are higher than they were last year.

Name Is Popular

United States Has Ten Villages Which Are Called Churchill

There are no fewer than ten villages in the United States called Churchill, writes the London Daily Sketch. Churchill in Nevada, noted for its salt mines, is probably the best known. In England it is in Somersetshire village which bears the name. The village church has an effigy of Sarah Jennings, Duchess of Marlborough. The British Prime Minister's ancestors were for hundreds of years closely associated with this peaceful spot in the Mendips.

A highway engineer says that some features of road design resemble snow drifting, and made in snowy country might well be designed accordingly.

Found The Best Man

Steel Magnate Passed Test Which Led To His Success

One day the manager of the Carnegie steel works went to the head of the draughting department and said, "I want your best man."

"We have," no best man," was the reply. "They are all good."

The next day an order was issued stating that, in order to complete a certain piece of work, all of the draughtmen would be required to work two hours overtime each day for several weeks without extra pay.

The following morning the manager asked the draughting chief how the men were taking the new order.

"They are all complaining about it," was the reply, "that is, all but one man."

"Let me have that man," requested the manager.

The young man thus singled out proved to be an exceptionally capable and energetic worker, and under the watchful eyes of the works manager began a rapid and steady advancement which eventually brought him to the presidency of the company. This was the able and greatly admired and respected Charles M. Schwab, Christian Science Monitor.

Quest Of Liberty

Desire For Justice Is The Hope Of Democracy

In these days of world convulsion democracy must have and create facilities of defence it has not known before. It can do that and still remain democratic. Democratic institutions can be reformed to meet the widening changes in the modern world and still preserve every principle of democracy that has made the quest of liberty and citizenship of the human race since recorded time.

The soul world revolution, it is this unmodified desire for justice that is the final hope for democracy. No man can be successfully "robbed" after he has known liberty. Hitler may erase from the walls of France those words of free—Liberty, Fraternity and Equality—but he can never erase them from French hearts. He may lead hard boys to England and lead them to the frontiers of culture and beauty, but he will never succeed in conquering the free British spirit.

Liberty is something of the heart and soul, the divine part of man, and neither bomb nor tank can destroy it.—Hamilton Spectator.

Liquid Coal

Great Possibilities Expected From A New Discovery

"Liquid" coal is just around the laboratory corner. For three years Dr. J. E. Hedrick of the Kansas state college chemical engineering department, and his graduate students have been working on methods of mining dry-ground coal and oil so the fuel might be piped to industrial furnaces and mobile motors.

New Dr. Hedrick thinks he just about has it. Advantages envisaged for this new fuel, which is technically an "oil-soluble" coal, include lower transportation costs, lower factory costs, more efficient heat and, finally, longer cruising ranges for battleships and destroyers.

Colloidal fuel in more or less finished state now may be seen in the laboratory. Some mixed last December still is stable—the coal hasn't settled.

Although encouraged by his success Dr. Hedrick said the experiments are far from complete and that it might be two or three years before the fuel is placed in commercial use.

Lacks Lubricating Oils

Germany's lack of lubricants eventually will prove to be the Achilles Heel of Hitler's mechanized war machine, Viscous, Bourne, British oil company executive, said in New York. Lord Bourne said this lack of lubricating oils won't be noticed until the shortage becomes acute—the first signs will be an increase of motor trouble, then breakdowns.

The sun is 93 million miles distant from the earth, has a diameter of 865,000 miles, and weighs 330,000 times more than the earth.

"Men should not be intimidated by their wives," states an essayist. They should remember they have a perfect right to do as she likes.

An every little is beautiful, we have often wondered where all the lovely married women come from.

Tortoise shell articles are made from marine turtles. 2385

ROYAL CHILDREN NOT WORRYING ABOUT THE WAR

Prince Edward, son of the Duke and Duchess of Kent, who celebrated his fifth birthday on Oct. 9th, and his sister Princess Alexandra, too young to realize what is going on around them, are shown enjoying themselves with their rubber animals at the Duke's home in Buckingham Palace.

Britain's Herbal Drugs

Acres Have Been Increased To Supply Foreign Markets

Britain is growing dandelions for export. It is one of the herbal drugs which the country used to import from France, Germany, Belgium and Italy. Chief in war-time importance among them are acetic, belladonna, digitalis, hennep, stramonium and valerian.

All are now being grown in sufficient quantities to meet British war-time needs after existing herb stocks are done, and British drug growers are even increasing their acreage to supply the foreign market. The U.S.A. are big buyers. The plants are exotic and fastidious in regard to climate and soil, yet although America has many climates and many soil types, the plants do not thrive there and they are therefore being imported from Great Britain. Among the chief herbal drugs now being grown in Britain for the home and export markets are digitalis, stramonium, acetic, valerian, pyrethrum, hennep, dandelion, taraxacum and calendula.

Britain's most important drug farms are in the south of England. There is also one in Scotland. Indeed, the oldest of them all, the Physic Garden, was founded in Edinburgh by a hospital in 1661.—St. Thomas Times-Journal.

Trying Hand At Farming

Mexico Girls Ask Authorities For Land To Start Colony

Girls of Galeana, Mexico, have asked the federal authorities at Mexico City for land to start a farm colony. They contended that women can make just as good farmers as men. The colony will be run exclusively by women. All of the farmettes will be versed in agriculture, but city activities will show an aptitude for farm work and are willing to undertake the endless succession of chores that farming requires will be admitted as members of the organization.

An Old Institution

Mutual fire insurance companies are among the oldest farm co-operatives in Canada. Ontario organized one in 1886 and several still functioning as farmer mutuals came into existence between 1890 and 1890. To-day there are 350 such companies carrying insurances of over a billion dollars.

Commands Must Be Quick

Soviet Officers Have To Omit Palaver In Military Orders

Red army and navy officers must drop "please" and "comrade" in their orders, and give quick, clear commands.

These are the latest additions to the Soviet military reform. It began with the creation of general, admiral and other officers' ranks, adoption of standing decorations for the postman's steps. If a letter is dropped in it is given an anxious going over by Sniffy, the fox terrier, who seeks the scent of his master's Private Denry Morrison, serving with the Scottish Highlanders in England.

When his master went away Sniffy was heartbroken, according to Mr. and Mrs. Morrison, and hid in an upstairs room, refusing consolation.

Then Denry's first letter came. The dog sniffed it, carried it to his lair in the kitchen and dared the family to take it away from him. They finally did, without the missive being chewed too much.

This has gone on ever since, say the parents of the dogs' master. Even though the letters have travelled thousands of miles the animal recognizes them the instant they come through the letter box.

"We know by the bark when a letter comes," says Mrs. Morrison. "Then we have to hunt for it, and retrieve it. Fortunately he does not harm the letters much. They are usually a bit chewed, but quite readable."

McGill University Rating

Military Training Is Made Compulsory For Women Students

Women students at McGill University who fail to attend the courses in connection with war service training will not be graduated, it was announced.

The announcement said by the university resolution passed by the senate of McGill University, war service training is compulsory in the case of all women students, except those who hold exemption certificates from the committee. No student, therefore, will be allowed to graduate without having attended the courses in connection with this training.

The training for women calls for four one-hour classes a week.

Thus Is China's Friend

Time in a civilization so venerable, space in a country so vast, human life in a country so populous, are gauged differently than in our young and impatient civilization. Three years of punishment? China has been punished before. Slow, creeping, inextinguishable, the enemy of impatient westerners, is China's friend.

BUNKS IN TIERS UNDER LONDON

This photograph was taken during an inspection by County authorities of sleeping bunks in a London public shelter.—Pamsey by Censor.

Livestock Production

Further Increases Expected, With Feed Supplies Adequate

Feed supplies in Canada are "generally adequate," the Dominion Bureau of Statistics said, in a review of the feed situation.

The bureau said further increases in livestock production were expected during the 1940-1941 season, with feed prices remaining low relative to livestock prices.

Total numbers of livestock at June 1, 1941, will likely be the greatest on record, the report said. "Although feed supplies in eastern Canada would need to be supplemented by larger shipments from the west this year, the outlook is good."

Large quantities of wheat stored in western farms would provide a reserve against feed shortages in the prairie area, but it was probable feed grain supplies in eastern Canada would need to be supplemented by larger shipments from the west this year.

The bureau forecast an increase in feed grain prices during the coming season and cited as an important reason the fact that feed grain production in eastern Canada generally had not kept pace with the increase in livestock production.

In spite of a 10 per cent. increase in the number of grain-consuming animals, a somewhat larger production of feed grain together with large stocks carried into the 1940-1941 season will provide about 7.00 million of feed grains per animal unit, an increase of .75 in 1939-1940, the bureau said.

"Although the supply per animal is lower than in 1939-1940, a probable reduction in exports of feed grains during the 1940-1941 season will have sufficient feed to carry Canada livestock through the winter," the report said.

Nazi Aviation Secrets

R.A.F. Mechanics Investigate Crashed German Planes

Nazi aviation secrets are being disclosed by the R.A.F. mechanics who examine crashed German planes and sometimes reconstruct them sufficiently to enable them to fly again.

Sometimes two or three crashed machines will supply material enough to make a reconstructed machine on which the R.A.F. test pilots and other experts get to work.

Engineers, scientists, metallurgists, and other experts examine the German construction methods, analyze the material used, examine details, before a reconstructed machine is put together for the testing ground.

All types of enemy machines have been gathered, even if sometimes only fragments of the plane are left. Microscopic examination reveals that the metal in German air engines is inferior, and that probably the Germans never have a shorter life than ours as well as being used in construction, but there are many exceptions which show the German engineers are not over-competent. Germans are replacing carburetors, with their tendency to ice-up, by fuel injection pumps. Each cylinder has a small pump, which injects a set amount of petrol.

One sign of German efficiency is in the self-sealing petrol tanks, but they have the disadvantage of being very heavy. These tanks have an outer coating of vulcanized rubber, next a thin layer of treated rubber, then a thick layer of pure rubber, one thickness of leather and the innermost wall of fire. When the tank is pierced the petrol melts the pure rubber and seals the hole.

Rubber boots used by the Nazi airmen carry an emergency automatic radio set packed in a tin. It has an umbrella aerial and a kite for flying a larger aerial.

Was Just A Miracle

R.A.F. Pilot Made Safe Landing With Badly Damaged Plane

Trapped in his cockpit, wounded in the shoulder and right eye, with the engine dead, the wings torn to pieces and the fuselage riddled with bullet holes, a young pilot of a Hurricane fighter glider nearly 20 miles to a safe parachute landing on a small field near Folkestone.

Technical experts who examined the plane wondered how it stayed in the air at all.

"It's not flying," said one high official. "It's a miracle."

A radio is now made especially for bicycles. It is compact, light weight, low priced. The batteries are mounted on the frame, the set itself has a shock-proof mounting on the handle bars.

CHAPTER XXIII.—Continued

He had to sit on the steps for a long time before he was sufficiently calm to go in. Listening at the door before he opened it, he crept into the hall, closed the door without a sound and tiptoed to his study. He was wet through and shivering. The suitcases were shining like patent leather. He took off his drenched overcoat and rang the bell. The maid who presently appeared was surprised to see him.

"I thought, sir—," she began, but he cut her short.

"Go up to my room—don't make a noise—and bring me down a complete change. You may tell your mistress that I shall not be up for some time."

Folding the messenger bag, he warmed his hands at the blaze. The girl came back with a bundle of clothes, announced her intention of making him a cup of tea, and discreetly retired.

Mr. Ellensbury started to change when a thought occurred to him. He might have to change again. His trousers were not very wet. And round about the pit was very muddy. He had thought of the pit in the car. Fate was working for him.

He put on his dressing gown and took down from a shelf two volumes which he had often read. The *Chronicles of Crime* they were called—a record of dark evil told in the stilted style of their Early Victorian editor. They were each embellished with fifty-two illustrations by "Paco."

He opened a volume at random.

"* * * when a female, young, beautiful and innocent, is the victim of oppression, there is no man with common feelings who would not risk his life to snatch her from despair and misery."

"This little bit of moralizing was the sentence he read. He turned the page, unconscious of his irony.

Maria Martin—she was in a barn. There was another woman killed with a sword. He turned the leaves impatiently, regretting at that moment so little acquaintance with the criminal bar. There was a large *ax*—where? Outside the kitchen door. He went down the kitchen stairs, passing the maid on her way up. Just outside the kitchen door, in the very place where he had seen it that morning. He brought it upstairs under his dressing gown.

"You may go to bed," he said to the maid, and when he had drunk his cup of tea he heaved on his wet overcoat and went out into the storm.

How very unpleasant! * * * Why couldn't they let him go away quietly? * * * an old man—white-haired, with a few years to live? Tears rolled down his cheeks at the injustice of his treatment. It was Harlow! Damn Harlow! This poor girl, who had been so lovely and so charming—what a beautiful creature she must be because of Harlow!

He dashed the wet tears from his eyes with the back of his hand, lifted off the padlock, and threw open the door.

The candle had burned down to its last flicker of life, but in that fraction of light before the wick sank into oblivion, he saw the white face of the girl as she stood, frozen.

with horror. Ellensbury swung his ax with a sob.

CHAPTER XXIV.

When Mr. Elk went into the office of his friend that afternoon, he found Jim engrossed in a large street plan that was spread out on the table. It had evidently been specially drawn or copied for his purpose, for there was a smudge of green ink where his sleeve had brushed.

"Playing house property?" asked Elk.

Jim rolled up the plan carefully and put it into his drawer.

"The real estate business," Elk went on, "is the easiest way of getting money I know. You can't be bluffed for it, and there's no comeback. Friend of mine bought a corner lot at Finchley and built a lot of ready-to-water villas on it—he drives his own Ford nowadays. I know another man—"

"Would you like to assist me in a little burglary to-night?" interrupted Jim.

"Burglary is my long suit," said Elk. "I remember once—"

"There was a time," mused Jim, "when I could climb like a cat, but I've not seen a cat go up the side of a house, and I've never quite understood how 'cat burglar' can be an apt description."

"Short for catferry?" suggested Elk.

"He can walk up glassed off to the suckers on their big feet. That's the natural history the same as flies. Where's the bust?"

"Park Lane, no less," replied Jim. "My scheme is to inspect one of the stately homes of England—the ancestral castle of Baron Harlow."

"He ain't been knighted, has he?" asked Elk who had the very haziest ideas about the peerage. "Though I don't see why he shouldn't be if—"

"(He mentioned an illustrious political figure) "was in office, Harlow would have been a duke by now, or an earl or embehn."

Jim looked out of the window at this rush hour with homebound-bound workers. It was raining heavily, and half a gale was blowing. Certainly the fog which had been produced by the weather bureau showed no sign of appearance.

"The weather people are letting me down," he said, "unless there's a change in the weather to postpone operations till to-morrow night."

Elk, who had certain views on the weather bureau, was of the opinion that the rain was of length. But he had also something encouraging to say.

"Fog is no more use to a burglar than a handkerchief. Rain that keeps policemen in doorways and stops amacher smooch is weather from heaven for the burglar."

Rain was falling in sheets on the Thames embankment when the police car, which Jim Carlton drove, came through the archway gate, and at the corner of Birdcage Walk he met a wind that almost overturned the car. He was blown across to Hyde Park corner.

No. 704, Park Lane was one of the four houses in that thoroughfare which was not only detached from other houses but was surrounded by a wall. It could boast that beyond the library stairs was a small garden, in which a cherry tree flourished. A police sergeant specially detailed for the service appeared out of the park and took charge of the car. In two minutes they were over the wall, dragging after them the book ladder which had been borrowed during the afternoon from fire headquarters.

The domed skylight of the library was in darkness and they gained its roof with little trouble. Here Jim let Elk as an advanced post. He had no illusions as to the difficulty of his task. All the upper windows were barred or secured by shutters; but that afternoon he had sent a low-flying aeroplane across the park and had secured an aerial photograph which showed a little brick building on the roof, which was probably a stair case and held a door that gave entrance to the floors below.

Jim drew himself up to the level of the first window, the bars of which made climbing a comparatively easy

matter, and, detaching the hook of the ladder, he reached up and gripped the bars of the window above. Fortunately he was on the lee side of Greenhart House and the wind that shrieked about its corners did not greatly hamper him.

In ten minutes he was on the flat roof of the house, walking with difficulty in his felt-soled shoes toward the square brick shed. Now he caught the full force of the gale and was glad of the shelter which the parapet afforded.

As he had expected, in the brick superstructure there was a stout door, fastened by a patent lock. Probably it was bolted as well. He listened, but could hear nothing above the howl of the wind, and then continued his search, keeping the rays of his powerful hand lamp within a few inches of the roof. There was nothing to be discovered here, and he returned to the stairway.

From his pocket he took a leather case of tools, tilted a small auger into a bit and pushed it in the thickness of the door. He had not gone far before the point of the bit ground against something hard. The door was steel lined. Replacing the tool, he pulled himself up to the roof of the shed, and he had to grip the edge to prevent being blown off.

The roof was of solid concrete, and it would need a sledge hammer and unlimited time to break through it. Possibly there was an unguarded window, though he did not remember having seen any.

Across the parapet and looked down into the side street that connected Park Lane with the thoroughfare where he had left his car. As he did so, he saw a man walk briskly up to the door, open it and enter. The sound of the slamming door was new to him. It was obviously Harlow; and then another man had that peculiar swing of shoulders in his walk. What had he been doing out on such a night?

Then it occurred to Jim that he had come from the direction of his garage.

Here's Real Relief for NOSES THAT CLOG, DRY UP AFTER DARK

3 PURPOSE MEDICINE
How much better you feel—when you clear nose of congestion!
Use at bedtime with V-A-T-R-O-NOL
V-A-T-R-O-NOL does 3 important things: (1) dissolves swollen membranes; (2) soothes irritation; (3) helps flush nasal passages, clearing clogging mucus, relieving transient congestion. It makes breathing easier, invites sleep.
Use V-A-T-R-O-NOL at first sniffing, and it helps prevent colds & crouping.

GEMS OF THOUGHT

KINDLINESS

The best portion of a good man's life is his little, nameless, unremembered acts of kindness and of love. Wordsworth.

Kindness in ourselves is the honey that blunts the sting of unkindness in another.—Laird.

A pure affection, concentric, forgiving self, forgiving wrongs and forestalling them, should swell the type of human love.—Mary Baker Eddy.

It is one of the beautiful compensations of life that no man can sincerely try to help another without helping himself.—Bailly.

Those who bring sunshine to the lives of others cannot keep it from themselves.—J. M. Barrie.

The one who will be lost in time is the one who is always doing good, considering small ones.—F. W. Robertson.

Prince Albert Land is the tenth largest island in the world, exclusive of Australia (which is known as a continent) with an area of 60,000 square miles.

"If you can't find no job—earn big money!"

I wish to write you at this time to express my appreciation for all you for all at Radio College, and great for me in regard to my placement as radio operator.

As you know, shortly after my graduation from the Bureau of Aeronautics, I was sent to the Radio College, where I have been engaged on a training basis.

Which after making several applications, on which I had returned to my passport, I was sent to the Radio College, where I have been engaged on a training basis.

Several weeks ago I was taken on at the college, where I was assigned to the radio wireless service, and I am now in the process of making the trip to the college, where I have been engaged on a training basis.

It is hard to realize that less than a year ago I had no job, now I earn big money.

The original of this letter may be seen on file at Radio College of Canada. Its writer is only one of a number of R.C.C. graduates now earning big money, each selected from the ranks of wireless operators in Canada.

Practical Radio Course

Broadcasting Stations and Recording Studios, many of Canada's leading Radio Manufacturers, Radio Jobbers and Dealers NOW employ operators, inspectors, testers and service men who were industriously trained in the Practical Radio Course. Other graduates of this course start in business for themselves as Air-Port, Ferry Services, R.C.M.P., and Land, Sea and Air Communications. Wonderful future, too, Train by Home Study, or in our modern Toronto College in Day or Evening Classes. Easy terms granted.

Wireless Operator Course

Trained Radio Operators are urgently needed in civil and government jobs. Practising work on Ocean and Great Lakes boats, Air-Port, Ferry Services, R.C.M.P., and Land, Sea and Air Communications. Wonderful future, too, Train by Home Study, or in our modern Toronto College in Day or Evening Classes. Easy terms granted.

Treating The Blind

Medical Science Is Making Remarkable Advances In Recent Years

In connection with the treatment of eye disorders, medical science is constantly breaking new ground. At a convention of medical men held in Memphis recently, one investigator reported that he had obtained substantially satisfactory results in the treatment of some forms of deterioration of the optic nerve by draining the sinuses. At the same meeting another doctor reported that his investigations had shown that certain types of cataract were not due directly to a condition in the eye itself, but to the fact that improper or unsuitable diets had led to a condition in the eye which made it particularly susceptible to the growth of cataract.—National News of the Blind.

A Reasonable Request

London Theatrical Man Appeared To Have Edge On Policeman

Richard Brinsley Sheridan, the famous playwright, was sitting in the House of Commons when news was brought that his Drury Lane theatre was on fire. Excusing himself, he made his way quickly to the scene of the conflagration.

He found the approach to the fire blocked by a great crowd, and it was not until considerable difficulty that he followed his way to the front and climbed under the ropes. A burly policeman roughly shoved him back into the crowd.

"I say," protested Sheridan, as pleasantly as the circumstances would permit, "surely a man may warn himself by his own fire."

"I'm afraid I shall have to summon you, miss. You were doing forty miles an hour," said the policeman.

"On, you are too late, officer," smiled the dame. "Another policeman told me about that three miles back."

The British Navy

The Most Important Factor In The Defence Of Britain

Sir Howard Egville, organizer and secretary of the Empire Parliamentary Association, credited the British fleet alone with "enabling the war to be carried on at a joint luncheon meeting of the Canadian and Empire clubs at Toronto."

"Great credit must also be given to the air force, of course," he said, "but by far the most important factor in the defence of Britain has been the unceasing vigilance of the navy. Not only the fate of the British Isles but the effectiveness of the Monroe doctrine depend in the main on the British fleet."

NOT EVEN THE SELFISH CAN WALK ALONE

No one, not the most selfish man could get along without the aid of other men. He wants the ploughs that others make, the cloth that others weave, the stones that others quarry, and the aid of others in building his houses. Without some kind of material aid man would be a savage. It is by people working together that cities are built up, that great vessels can cross the seas, that government, law and order are possible, all that we know of civilization. It is this mighty power he co-operative movement which to apply scientifically to Ireland and its roils was, more especially to the problems of agriculture.

Before the co-operative movement turned people did indeed benefit by each other's existence and we know but the principle was not applied directly to agriculture, and farmers worked alone on their land, bought their raw materials, cultivated their land, produced food and marketed it, and did it all by themselves with only the expectation of their families.—The Irish Homestead.

FALL RAINS 45 PER CENT ABOVE NORMAL IN ALBERTA

Precipitation during September and October was about 45 percent above normal in Alberta, the highest recorded in the three prairie provinces, according to the James Richardson and Sons Ltd. report.

Fall rains do not guarantee a crop, but they do act as a reserve on which the plant can draw. They are a form of "insurance" against drought the following year.

During September and October the precipitation was about 10 per cent below normal in Manitoba, and 15 per cent above normal in Saskatchewan.

SOME POULTRY FIGURES

How many hens and chickens are there in Canada and in Alberta? That would be a good question for one of the radio quiz programs, and the likelihood is that extremely few could answer it.

On June 1st, 1939, there were 60,201,000 hens and chickens on Canadian farms.

The number on Alberta farms at that date totalled 7,103,000. Ontario is the leading poultry province in Canada, with Quebec second, Saskatchewan third, and Alberta in fourth place.

"Daddy, do they raise political plums from seeds?"

"No, son. Political plums are more often the result of a bit of clever grafting."

Snicklefritz-----

A man is an innocent creature. He thinks the lady is being natural when every woman present knows she is showing off.

The English language is a funny thing all right. Tell your best girl that time stands still when you look into her eyes, and she'll be sure to say so. But if you say her hair does not stop a clock be sure you haven't made the down payment on the engagement ring.

"Now, children, if there were four flies on the table and you killed one, how many would there be left?"

"Please, teacher, I know—the dead one."

The reason it takes a woman longer to dress than a man is that she has to slow down at the curb.

Mrs. Jones: "Two of my daughters are working girls."

Mrs. Smith: "Huh! Two of mine are working men."

"Have you brought many people to your way of thinking?"

"No," answered the great politician. "Public opinion is something like a mule I owned when I was a boy. In order to keep up the appearance of being driven I had to watch the way he was going and follow on behind."

"Darling, as I kissed you then, love was born."

"That's fine, dear, but wipe that birthmark off your lips."

Doctor: "The best exercise for your wind is skipping rope."

Contractor: "Doe, I refuse to give up cigars."

Doctor: "What you need is an electric bath!"

Patient: "Nothin' doin', doc! I had an uncle down th' way at Sing Sing."

Detectives were questioning a Negro charged with stealing a typewriter. Not getting anywhere, one of the officers brought in the machine.

"Mah goodness!" the Negro exclaimed. "Is that a typewriter? Ah thought it was a cash register!"

"I'll bet you think twice before you leave that wife of yours alone in the evenings."

"I'll say! First I have to think up an excuse for going out, and then a reason why she can't come with me."

A famous London tavern which had its windows shuttered, displayed a notice: "Open as Usual." A little tea and coffee shop next door, also badly battered, stuck up a sign: "More open than usual."

DRUMHELLER MUNICIPAL HOSPITAL SALE OF SPECIAL CONTRACTS

The Board of the Drumheller Municipal Hospital District No. 3 announced that Special Contracts will be made available to those persons who are desirous of obtaining the \$1.00 per day rate and reduced rates for special services for themselves and their dependents at the hospital in Drumheller. Sale of these contracts will begin immediately and will continue until midnight December 31, 1940. These contracts will go into effect January 1st, 1941, and will remain in force until December 31st, 1941. Contracts may be purchased at the business office of the hospital in Drumheller for the sum of \$10.00. Any further particulars desired may be obtained from the undersigned.

L. WILSON, Secretary-Treasurer

Victoria Is Popular In The Winter For Warm Weather And Summer Sports

Canada has an evergreen playground where snow is an ephemeral novelty, flowers bloom every month of the year and even in mid-winter the day's recreation includes jacking, tennis, hiking, lawn bowling, fishing or a round of golf over the fast, green fairways of any of a half dozen outstanding courses.

Victoria, centre of this beautiful British Columbia evergreen playground, has become in recent years an outstanding Canadian "winter" resort; this year it seems to be on the verge of its busiest season with international exchange offering Americans an attractive financial inducement of ten per cent on their dollar, while Canadian lovers of mild weather will find that Vancouver Island has the only resort of this kind on the continent which they can visit now that holiday trips to the United States have been banned.

The main competitive sports event of the season is the Empress Winter Golf Tournament which is held on well trimmed grass fairways and greens at a time when other Canadian courses are several feet under the snow-drifts. This year's tournament, the 11th annual, will be held on the Oak Bay course, March 9 to 15. The outstanding social event of the season is Christmas at the Empress Hotel where Canada's most-English city celebrates with the time-honored boar's head, Yule logs, mince pies and carols.

The contrast between Victoria and the rest of Canada in winter is particularly marked after a train trip through the Canadian Rockies, then at their loveliest in a mantle of ice and snow. Vancouver Island produces such rarities—rareties to the rest of Canada, that is — as strawberries in December, salmon fishing all winter long, new-born lambs in January and roses in February.

The pictures above show the Empress Hotel, and typical "winter" scenes, hiking, golfing and yachting.

APPLES

FRESH FROM CANADA'S WORLD FAMOUS ORCHARDS

These big, red apples are ripe and delicious — good eating either fresh or cooked! Order a generous quantity from your fruit market TO-DAY.
